US\$ 10 Million
Outright Sale

Opportunity Description

The Hwange Lithium Project is an emerging lithium exploration opportunity located in Hwange, Zimbabwe, covering a 450-hectare tenement prospective for pegmatite-hosted lithium mineralization. Currently at the early exploration and prospecting stage, the project has recorded promising stockpile sample results with ore grades of up to 9.8% Li₂O, indicating strong potential for high-value lithium resources. Planned as an open-pit mining operation, the project is advancing under an Exploration Results resource category, with further drilling and evaluation expected to define the resource and life of mine. With an estimated investment requirement of approximately USD 10 million, the project presents an attractive early-stage opportunity for investors seeking exposure to Zimbabwe's growing lithium sector.

Date Created: 02/04/2025

Opportunity KPIs

- 1 Ore Grade**
Up to 9.8% Li₂O (Stockpile sample)
- 2 Investments**
US\$ 10 million
- 3 Resource Type**
Pegmatite-hosted lithium mineralization
- 4 Resource Category**
Exploration Results
- 5 Project Status**
Exploration Results
- 6 Tenement Size**
450 Ha
- 7 Resource Evaluation**
Not yet defined

Mutoko Lithium Project

US\$ 30 Million - Outright Sale

Opportunity Description

The Mutoko Lithium Project, located in Mutoko, is an early-stage lithium exploration opportunity covering a substantial 2,810-hectare tenement prospective for pegmatite-hosted lithium mineralisation. Initial stock-pile sampling has returned encouraging ore grades of up to 3.16% Li₂O, highlighting the potential for high-grade lithium mineralisation within the project area. Currently classified under the Exploration Results resource category, the project is in the early exploration and prospecting stage, with plans for open-pit mining once resources are defined through further geological work and drilling. With an estimated investment requirement of USD 30 million, the project presents a promising opportunity for investors seeking exposure to Zimbabwe's growing lithium sector and the global battery minerals market.

Date Created: 02/04/2025

Opportunity KPIs

- 1** Ore Grade
3.16% Li₂O
- 2** Investments
US\$ 30 million
- 3** Resource Type
Pegmatite-hosted lithium mineralization
- 4** Resource Category
Early Exploration / Prospecting stage
- 5** Project Status
Exploration Results
- 6** Tenement Size
2,810 Ha
- 7** Resource Evaluation
Rock chip sampling

8. Lithium Opportunity

Acturus Lithium Prospect

US\$ 4.5 Million
Outright Sale

(P) +26324250592 | info@investorhosting@gmail.com
9 Sunridge, Colne Valley, Ballentyne Park, Harare
www.investorhosting.com

Opportunity Description

The Acturus Goromonzi Lithium project, situated in Goromonzi, Mashonaland East, Zimbabwe, is a promising greenfield mining opportunity within the Southern Africa economic corridor. Covering 1,000 hectares of white quartz-feldspar pegmatitic material, the project has delivered trenching results (2.5m depth) grading 0.71% lithium, confirming its strong potential as a lithium-bearing operation. In addition, significant gold deposits were discovered during exploration, positioning Acturus as a dual-commodity asset with exposure to both lithium and gold. With an estimated mine life of 10 years and a required investment of US\$4.5 million, Acturus offers a strategically located and high-potential entry point into Zimbabwe's lithium-gold belt and the rapidly expanding battery minerals market.

Date Created: 02/04/2025

Opportunity KPIs

- 1 Ore Grade**
0.71% Li₂O (Best Assay)
- 2 Investments**
US\$ 4.5 million
- 3 Resource Type**
Pegmatite-hosted lithium (quartz-feldspar pegmatite)
- 4 Resource Category**
Greenfield/Early Exploration
- 5 Project Status**
Exploration Results
- 6 Tenement Size**
1,000 Ha
- 7 Resource Evaluation**
Trenching (2.5 m depth) + Geophysics

9. Lithium Opportunity

Mudzi Lithium Mine

US\$ 1.5 Million
Outright Sale

(P) +26324250592 | info@investorhosting@gmail.com
9 Sunridge, Colne Valley, Ballentyne Park, Harare
www.investorhosting.com

Opportunity Description

The Mudzi Lithium Mine is a brownfield lithium exploration project covering approximately 353 hectares and hosting coarse-grained pegmatized and quartzite-hosted lithium mineralisation. Preliminary exploration through rock chip and soil sampling indicates ore grades of up to 3.5% Li₂O, highlighting strong potential for resource development. The project is expected to utilise open-pit mining methods and requires an estimated investment of about US\$1.5 million to advance exploration and development activities, presenting an attractive opportunity within Zimbabwe's growing lithium sector.

Date Created: 02/04/2025

Opportunity KPIs

- 1 Ore Grade**
Up to 3.5% Li₂O
- 2 Investments**
US\$ 1.5 million

10. Lithium Opportunity

Lambo Lithium Mine

(P) +26324250592 | info@investorhosting@gmail.com
9 Sunridge, Colne Valley, Ballentyne Park, Harare
www.investorhosting.com

US\$ 800,000
Outright Sale

Opportunity Description

The Lambo Lithium Mine, located in Hwange, Zimbabwe, is an early-stage exploration project covering a 150-hectare tenement and targeting pegmatite-hosted lithium mineralization with ore grades reaching up to 5755.6 ppm Li₂O. Classified under exploration results, and an asking price of US\$800,000 the project is currently in the prospecting phase with its estimated resource, and life of mine yet to be defined. Planned as an open-pit operation, the opportunity offers significant upside potential for investors seeking exposure to high-quality lithium resources in a strategic African location.

Date Created: 02/04/2025
